

Cricket outfields without ryegrass

- Produces a fine dense sward
- Lower mowing requirements
- Less water and nutritional requirements
- Strong recovery from creeping grasses
- Good disease resistance

Ratings

A non-ryegrass outfield mix that produces a very tight sward which will have low nutrient requirements, along with good drought tolerance

This mixture is treated with Headstart® GOLD

| % | Cultivar | Species |
|-----|----------|-----------------------------|
| 40% | BENJI | Strong creeping red fescue |
| 35% | CATHY | Slender creeping red fescue |
| 20% | CALDRIS | Chewings fescue |
| 5% | HIGHLAND | Browntop bent |
